EDUCATION

Indiana University
PhD, Program in Neuroscience — August 2011 - December 2017

University of Nevada, Las Vegas
B.S., Biology, Biomathematics — August 2011

LABORATORY AFFILIATIONS

Integrative Neuroscience section,
National Institute of Neurological Disorders and Stroke

PI: Joshua Gordon, David Kupferschmidt — February 2018 - present

- Tetrode and shank recordings from awake mice
- Closed-loop optogenetic stimulation
- T-maze

Indiana University Purdue University Indianapolis

PI: Christopher Lapish — August 2014 - December 2017

- Tetrode and shank recordings from anesthetized and awake rats
- Data analysis: state space, spectral decomposition, machine learning
- Development of automatic behavior collection and analysis tools
- Contribution to VTA/mPFC computational modeling (collaboration with A. Kuznetsov, IUPUI Math)
- TH-Cre optogenetics with anesthetized electrophysiology

Indiana University

PI: John Beggs — August 2011 to August 2014

- Statistical analyses of in vitro 512-electrode array data from mouse/rat hippocampus (collaboration with Litke lab, UC Santa Cruz), in vivo Utah array primate data (collaboration with Hatsopulous lab, U. of Chicago)
- Transfer entropy, mutual information, community detection

RESEARCH PROJECTS

Closed-loop excitation of hippocampal terminals from prefrontal cortex
Using hippocampal theta to guide excitation of ventral hippocampal inputs to mPFC. Working memory performance will be tested while using this closed-loop excitation paradigm.

Cortico-hippocampal interactions in the radial arm maze
Characterizing the process of planning in delayed spatial win-shift task using optogenetic inhibition of HC; shank and wire mPFC recordings

Effects of ethanol on interactions beetween VTA GABA and DA neurons and mPFC
Dissecting local and distal dynamic connectivity of ventral tegmental area using dual-site single-unit recordings, optogenetic stimulation, and pharmacological manipulations as a part of France-USA computational modeling collaboration

Zarrabi K, Nitrosesatien N, Koh J, Naserddin S, Abanyan E, **Myroshnychenko M**, Esteves J, Harbour D, Porter H. Antibacterial Potential and GC-MS Studies of Select Medicinal Plants of Mojave Desert. Presented at the 2009 Northwest Regional Meeting of the American Chemical Society, Pacific Lutheran University, Tacoma, WA.

Awards

Fellowships

- National Science Foundation Biomathematics Scholar May 2010 - May 2011
- University of Nevada, Las Vegas McNair Summer Institute Fellowship May 2010

Teaching Experience

Neuromatch Academy, International, online

Lead Teaching Assistant Summer 2020

Hands-on teaching computational neuroscience
for a group of five students while also supervising four other TAs.

Dynamical Neuroscience summer school, Kyiv, Ukraine

Lecturer Summer 2019
Three-lecture series of hands-on demos on the analysis of big neuroscience data

Indiana University, Bloomington, Indiana

Teaching assistant Fall 2014
Addiction neuroscience lecture and lab. Responsible for grading, lab preparation

The Lovaas Center of Las Vegas, Las Vegas, Nevada

Tutor June 2009 - August 2009
Applied Behavioral Analysis for children with autism.

College of Southern Nevada, Las Vegas, Nevada

Tutor September 2009 - May 2009
Responsible for coaching students on various subjects including biology, writing, and mathematics.

Summer school attendance

The Neuropixels course (UCL) March 2019
- Spike sorting massively parallel recordings
- Hands-on experience with Neuropixels probes

CoSMo (Northwestern University) June 2013
- Computational Sensory-Motor Neuroscience, organizer K. Kording
- Machine learning, Bayesian and neural net approaches to decoding

CRCNS July 2014
- Berkeley summer course in mining and modeling of neuroscience data, organizers Jeff Teeters and Fritz Sommer
- STC, model fitting, ICA, GLM

Skills

Experimental techniques
- Stereotaxic surgery
- Awake behaving/anesthetized extracellular electrophysiology
- Spikesorting shank data (spyking circus, phy packages)
- Optogenetics

Programming
- Python, Matlab, mex/C, git, Linux
- Databases: Datajoint, MySQL, xarray
- Graphics: matplotlib, seaborn, holoviews, altair

Real-time processing
- Linux OS, Open Ephys, Arduino, PulsePal

Scholarships and grants
- University of Nevada, Las Vegas Scholarship November 2009
- College of Southern Nevada Scholarship November 2008
- Federal SMART grant 2009 - 2011
